

N-FLUTE

I - B O A R D S
...alternative to solid fibre

Introducing the newest addition to our microflute line-up

An excellent alternative to folding carton, solid fibre and E Flute. Ideal for postprint flexo and direct print offset by eliminating the need for extra operations such as litho laminating yet offering strength and rigidity with less fibre.

Current process

N-flute process

Benefits of the N-flute process

- No lamination required
- Direct print on smooth clay coated SBS surface or brown recycled liner
- Speed to market
- Will accept foil stamping, embossing, and windowing
- Custom cut sheets within 5-8 business days
- Available in high end retail solid white and industrial brown recycled liners and medium
